**Date:** August 4, 2015

**Subject:** Class V UIC Inspection Report

**From:** Luis Rodriguez, Environmental Scientist, GWCS

**To:** Nicole Foley Kraft  
Ground Water Compliance Section

**UICID:** 11NY05904032

**Facility**

Cumberland Farms, Inc. #800004/V2204  
449 Glen Cove Road  
Roslyn Heights, NY 11577  
Nassau County

**Facility Location**

Latitude 40.78535° N  
Longitude: -73.62245° W

**SIC Code:** 5541, Gasoline service stations

**Inspection Date:** January 19, 2011

**Primary Inspector:** Voluntary Submittal

**UIC Wells Found** Yes

**Inspection Comment**

Five (5) storm water drainage drywells – only rain/snow runoff is authorized to be discharged to these wells. Best management practices must be implemented to avoid discharges of contaminants to the storm water drywells from activities at the facility. Potential contaminating activities include, but are not limited to, gasoline spills, fluid spills from vehicular repair, improper storage and disposal of wastes and chemicals, deicing chemical applications, pesticide and herbicide applications, asphaltting and seal coating operations. A spill prevention, mitigation and response plan must be in place and on file, staff must train to implement the plan and a spill kit must be available on-site.

bc L. Rodriguez

Well Closure Review

Dear Mr. Johnson:

The U.S. Environmental Protection Agency (EPA) has reviewed the well closure report for the above-referenced facility and finds it acceptable. EPA will now close the Underground Injection Control program file for the above-referenced facility.

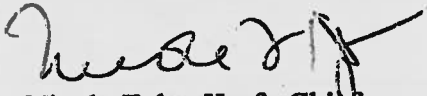

Please address any future correspondence you may submit to this office as follows:

Nicole Foley Kraft, Chief  
Ground Water Compliance Section  
United States Environmental Protection Agency  
290 Broadway, 20<sup>th</sup> Floor  
New York, NY 10007-1866  
Re: 11NY05904032  
Attn: Luis Rodriguez

Failure to submit any and all information truthfully and accurately may subject you to sanctions authorized by federal law. Please also note that all information submitted by you may be used in an administrative, civil judicial, or criminal action. In addition, making a knowing submission of materially false information to the U.S. Government may be a criminal offense.

If you have any questions please contact Luis Rodriguez of my staff at (212) 637-4274 or [rodriguez.luis@epa.gov](mailto:rodriguez.luis@epa.gov).

Sincerely,

Nicole Foley Kraft, Chief  
Ground Water Compliance Section

Authorization to Inject

Dear Mr. Johnson:

This letter serves to inform you that the U.S. Environmental Protection Agency is in receipt of inventory information addressing wells authorized by rule located at the above-referenced facility in accordance with 40 Code of Federal Regulations (CFR) §144.26. The operation of the following Underground Injection Control wells are authorized by rule, pursuant to 40 CFR §144.24:

**Five (5) storm water drainage drywells – only rain/snow runoff is authorized to be discharged to these wells. Best management practices must be implemented to avoid discharges of contaminants to the storm water drywells from activities at the facility. Potential contaminating activities include, but are not limited to, gasoline spills, fluid spills from vehicular repair, improper storage and disposal of wastes and chemicals, deicing chemical applications, pesticide and herbicide applications, asphaltting and seal coating operations. A spill prevention, mitigation and response plan must be in place and on file, staff must train to implement the plan and a spill kit must be available on-site.**

Authorization to Inject

Dear Mr. Johnson:

This letter serves to inform you that the U.S. Environmental Protection Agency is in receipt of inventory information addressing wells authorized by rule located at the above-referenced facility in accordance with 40 Code of Federal Regulations (CFR) §144.26. The operation of the following Underground Injection Control wells are authorized by rule, pursuant to 40 CFR §144.24:

**Five (5) storm water drainage drywells – only rain/snow runoff is authorized to be discharged to these wells. Best management practices must be implemented to avoid discharges of contaminants to the storm water drywells from activities at the facility. Potential contaminating activities include, but are not limited to, gasoline spills, fluid spills from vehicular repair, improper storage and disposal of wastes and chemicals, deicing chemical applications, pesticide and herbicide applications, asphaltting and seal coating operations. A spill prevention, mitigation and response plan must be in place and on file, staff must train to implement the plan and a spill kit must be available on-site.**

Should any conditions change in the operation of any of the wells listed above (such as injectate composition, closure of the well, injection of cooling water greater than 150 degrees Fahrenheit, construction of additional wells, etc.) you are required to notify this office within five (5) days. Any accidental spills into a well should be reported within twenty-four (24) hours after the event. Change in operation information should be addressed to:

Nicole Foley Kraft, Chief  
Ground Water Compliance Section  
United States Environmental Protection Agency
